

DISSOLVA – The Most Advanced Waterless Scouring System

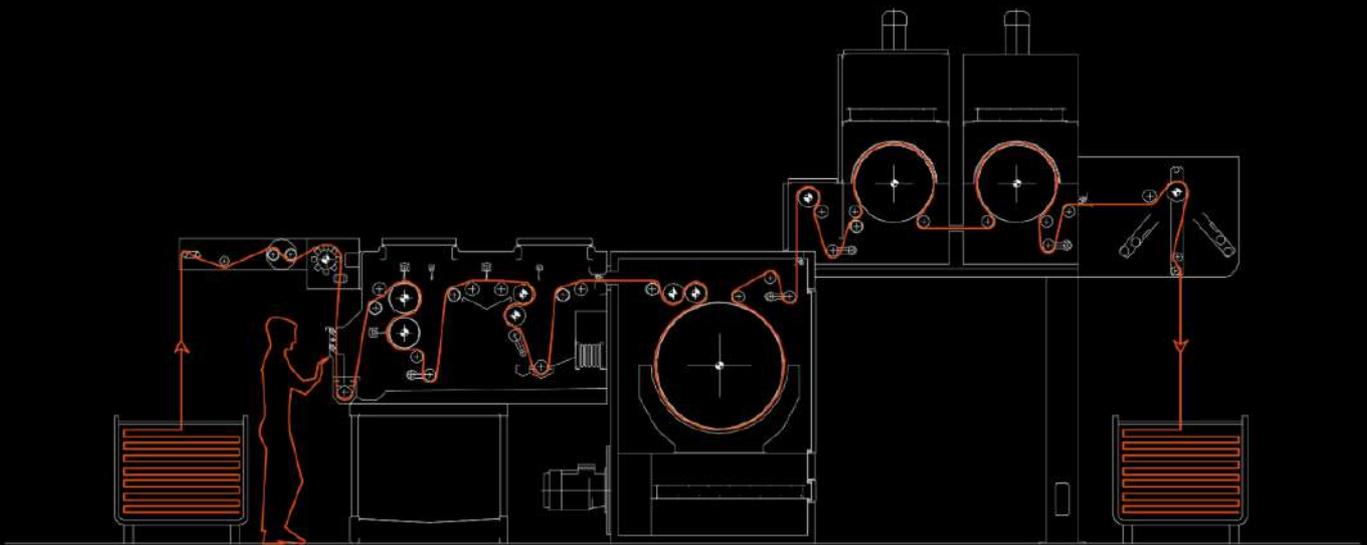

**Powerful De-Oiling | Lower Costs |
Eco-Friendly Technology**

Revolutionizing Fabric Preparation with Waterless Innovation

Eliminate water-intensive scouring and embrace sustainability with **DISSOLVA**, the **next-generation solvent-based scouring system**.

Designed to **remove maximum oil**, reduce production costs, and **eliminate wastewater**,

DISSOLVA is the future of textile finishing.

Why Choose DISSOLVA?

Superior De-Oiling for Vibrant Colors – Removes more oil than traditional water-based scouring, ensuring **richer, more even colors**.

Perfect for High-Stretch synthetic knits & Wool Fabrics – Ideal for **activewear, wool degreasing, and delicate textiles**.

Eco-Friendly Closed-Loop System – **Zero water consumption, zero discharge** into air or water.

Maximize Savings & Efficiency

- **Lower Production Costs** – No water usage, no wastewater treatment, and reduced energy consumption.
- **Over 99% Solvent Recycling** – Minimizes waste and maximizes sustainability.
- **Energy-Efficient Process** – Solvent evaporates faster than water, cutting drying time and energy costs.
- **Lower Dyestuff Consumption** – Cleaner fabrics require less dye, improving color efficiency.
- **Optimized Production Workflow** – Scouring and drying in one step, freeing up stenter frames for heat-setting.

The most sustainable and safe scouring system for the environment

Closed loop system designed without any exhaust to air or drains to water.

No water consumed. No water treatment needed.
